## *Meet Your Family*

**The Green Family**

The Green family knows firsthand what it means to work hard to make their dreams become a reality. Stephanie and Zacchaeus Green clearly understood what it would take to provide their children with a safe, stable home to grow up in. As Zacchaeus simply puts it, ““There is no way the apartment will ever be yours, and that’s frustrating.” With their vision of homeownership in mind, the Green began the path toward sustainability through the Dallas Habitat program.

Stephanie and Zacchaeus Green have spent their entire lives right here in Dallas and are looking forward to raising their three children here, as well. Stephanie works as a teacher, while Zacchaeus is a barber, which he describes as a relaxing profession. Their sons, Zakiah (10), Zamyron (8) and Zayvia (4) are ecstatic to have their own backyard where they can play football and wrestle whenever they want! Stephanie and Zacchaeus are equally excited to be able to give their children a safe, healthy place to play and make friends. Everyone—especially Zakiah—is excited to have their own spaces.

Previously, the family rented a small apartment where they constantly worried about noise complaints and safety concerns. Now in their own home, the Green family feels more at ease and ready to be part of a tight-knit community. The Green family have found the Dallas Habitat program to be an easy process and a great opportunity that they would recommend to anyone. As Zacchaeus puts it, “The biggest surprise, hands down, is the 0% interest rate! You just can’t get that anywhere else.” The Greens know that homeownership is the first step in achieving all their dreams to come!
